

Md. Sihab Bhuiyan

Jatrabari, Dhaka - 1362 – Bangladesh

+8801854149890 • sihab.bhuiyan68690@gmail.com

Objective

Aspiring Data Scientist with a background in Computer Engineering and solid experience in front-end development using HTML, CSS, JavaScript, Tailwind, and React. Passionate about data-driven problem solving, with hands-on experience in data analysis, visualization, and research—particularly in medical domains. Familiar with Firebase, Node.js, and Express.js, and skilled in using Python for analytics. Known for clean UI design, analytical thinking, and turning complex data into actionable insights.

Experience

North South University

Research

Engaged in interdisciplinary research projects focusing on data analysis and real-world problem-solving. Contributed to medical research papers involving data-driven insights, statistical analysis, and visualization. Developed skills in data collection, preprocessing, and interpretation using tools like Python and Excel. Collaborated with peers and faculty, strengthening analytical thinking and academic writing.

Programming Hero

Web Development

Skilled in creating mobile-first, responsive websites using HTML, CSS, JavaScript, Tailwind CSS, React, Firebase, Node JS, and Express JS. Experienced in designing layouts that adapt seamlessly across devices to ensure optimal user experience and accessibility.

Udemy

Online Learning

Completed courses:

- Python Development, Data Science: Variables and Data Types (MTF Institute)
- Master Git and GitHub - Beginner to Expert

Education

Bashundhara, Dhaka, Bangladesh

North South University

B.Sc. in Computer Science and Engineering

Pursuing a Bachelor of Science in Computer Science and Engineering (B.Sc. in CSE) under the Department of Electrical and Computer Engineering (ECE). The program emphasizes software development, computer systems, and engineering principles. Alongside full-stack development, I've developed a strong interest in data science and analytics, supported by experience in research and data-driven projects.

Publications

- Revolutionizing Workout Analytics: Machine Learning Models for Calorie Burn Estimation.
DOI: 10.32896/ajmedtech.v4n2.33-45
- Kidney Cancerous Tumor Prediction Using CNN System Architecture.
DOI: 10.32896/ajmedtech.v4n1.57-70

Skills

Technical: Front-End Development, Python for Data Analytics, Data Visualization

Core: Analytical Thinking, Research, Organization, Clerical Support, Cultural Awareness, Social Perceptiveness
